Other Optional Vaccines (recommended)

Age	Vaccine	Date Vaccinated
2 months - 5 years	Pneumococcal	
2 - 6 months	Rotavirus	
15 months	Chicken Pox	29/3/14 SN Kastman
2 years	Hep A1	
2 1/2 - 3 years	Hep A2	

Some note on Optional Vaccines

Pneumococcus is a bacteria that can cause serious illness in young children, particularly of the brain (meningitis), lungs (pneumonia) and ears (otitis media). Your child will receive 1-4 doses depending on his or her age, and you will be advised accordingly by your doctor.

Rotaviruses are one of the most common germs causing diarrhoea, which can be serious and life-threatening. 2 doses of the vaccine are given by mouth, 1 month apart.
